## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The method lacking the steps of flowing the cleaning liquid into the channels of the article and cleaning the article by transmitting vibrational energy, which are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

The steps of flowing the cleaning liquid into the channels of the article and cleaning the article by transmitting vibrational energy, which are critical or essential to the practice of the invention. These steps are not included in the claims. The method without these steps is not enabled by the disclosure.

3. Claims 22-40 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The apparatus lacking means to connect the reservoir to the channels and means for flowing the cleaning liquid through the channels, which are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

Means to connect the reservoir to the channels and means for flowing the cleaning liquid through the channels are critical or essential to the practice of the invention. However, they are not included in the claim(s). The apparatus without these means is not enabled by the disclosure.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to all claims: The claims are indefinite because it is not clear what is required by the limitation "interface adapted to accommodate attachment". What structure is required?

As to claims 1-20: The claims are indefinite because it is not clear how the recited structure of the apparatus limit the method. It has been held that to be entitled to weight in method claims, the recited structure limitations therein must affect the method in a manipulative sense, and not to amount to the mere claiming of a use of a particular structure. *Ex parte Pfeiffer*, 1962 C.D. 408 (1961).

As to claims 6, 21, and 41: The claims are indefinite because it is not clear what is referenced as "n = 1,3,5,7,9, ...".

Claim 22-40 are indefinite because it is not clear how energy can comprise a frequency and a wavelength.

***Allowable Subject Matter***

6. Claims 21 and 41 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

7. The following is a statement of reasons for the indication of allowable subject matter: US Patents 6,663,178, 6,210,488, 5,464,479, 5,679,174, 4,595,419, 5,529,635, 6,572,709, and 5,490,882 are made of the record to show the state of the prior art with respect to apparatuses and methods for cleaning internal surfaces with vibrational energy. US Patent 6,663,718 is considered to be the closest prior art. This document teaches a method and apparatus for cleaning internal surfaces of an article by flowing a cleaning liquid and applying ultrasonic energy. However, the document teaches generating of ultrasonic inside of the article. The examiner takes the position that the prior art taken alone or in combination fails to teach or fairly suggest all the claimed limitations recited by claims 21 and 41.
